

BIO-CIRCLE

CASE STUDY SNAPSHOT

"Effectively cleans our specialist parts & no more solvents!"

BIO-CIRCLE GT Maxi

INDUSTRY: CNC - cleaning parts from cutting coolants & metal chips after processing

CLEANING APPLICATION: Cleaning precision parts produced from CNC machining post production and before packaging. Current cleaning process was a solvent-based wash basin.

BIO-CIRCLE CLEANING PROCESS: **BIO-CIRCLE GT Maxi** with **CB 100 & CLEANBOX**

THE RESULT: A much more efficient and safe cleaning process that completely replaced solvent-based wash basins. Significantly reduced waste chain & a more pleasant working environment by not having to use solvents in the cleaning process.

CB 100

Ready to use

Unlabelled according to CLP-regulations

Optimal performance, protection of employees, reduction of environmental impact

VOC free

Suitable for use in the food industry
