

BIO-CIRCLE

CASE STUDY SNAPSHOT

INDUSTRY: Rail

CLEANING APPLICATION: Brakes

BIO-CIRCLE SYSTEM/ LIQUIDS USED: **CB 100** in industrial sprayers. Previously the brakes had been cleaned with brake cleaners. Brake cleaners contain Tetrachloroethylene which has serious health and safety risks through both short-term and long-term exposure. It is a group 2A carcinogen.

CUSTOMER REQUIREMENT: An improved cleaning process that is safe, a reduced risk to health and safety and that is cost-efficient.

THE RESULT: Very powerful but safe cleaning and degreasing. Rolled out to two further workshops for our customer.

CB 100

VOC free

Optimal performance, protection of employees, reduced environmental impact

Unlabelled according to CLP Regulations

Suitable for use in the food industry

Ready to use
