

BIO-CIRCLE

CASE STUDY SNAPSHOT

INDUSTRY: Rail

CLEANING APPLICATION: Cleaning & degreasing electric train motors - grease, oil & brake dust

EXISTING CLEANING PROCESS: Corrosive cleaner

THE PROBLEM WITH THIS: Health, safety & environmental issues. Hidden costs, especially in relation to compliance, storage and specialist disposal. Uneconomical and not energy efficient. High turnover of cleaner used.

BIO-CIRCLE CLEANING PROCESS: **STAR FUTURE V** manually applied with a foam applicator.

THE RESULT: Happier workforce using low-risk cleaners. Great cleaning result.

STAR 100

Can be diluted

VOC free
